

# AMEH ABRAHAM AJENE

---

No. 1, George Street Ijedodo, off Agayi Road Ijegan Lagos.

+234 (0) 706 203 8179 | +234 (0) 9059023380

[ajene.ameh.abraham@gmail.com](mailto:ajene.ameh.abraham@gmail.com)

---

*Contributing to innovative software solutions that meet all the daily business demands.*

- Software developer with experience in high-performance web technologies.
- Technologist skilled at defining, designing and implementing highly secure data intensive software solutions.
- Quality engineer bringing a strong focus on product and customer success into the software development process.

---

## DEVELOPMENT METHODS

---

Test Driven Development (TDD) | Object-Oriented Design & Development

---

---

## TECHNOLOGIES

---

C++, C, Git, Python, DJANGO, JSON, HTML, CSS, Linux, Docker, Javascript, SQL Server, Pandas, Numpy, React Native, PostgreSQL, VueJS, SQLite, Jupyter, JIRA.

---

## WORK EXPERIENCE

---

**Redwhale**

June 2018 – Date

*Software Engineer*

- Design, develop and maintain Web Data Scrapers
- Identify and resolve performance and scalability issues with all production software's
- Help identify, debug and fix core problems with all projects
- Work with system architects to contribute to high-level technical designs
- Produce consistent, high quality code by following industry best practices and company standards
- Leverage automation across testing, integration, and deployment activities
- Work hand-in-hand with product owner to break down features into actionable user stories

**Hisect**

Nov 2017 - June 2018

*Co-founder and Lead Developer*

- Writing reusable, testable, and efficient code
- Design and implementation of low-latency, high-availability, and performant applications
- Integration of user-facing elements developed by front-end developers with server-side logic
- Implementation of security and data protection
- Integration of data storage solutions
- Coordinate with internal teams to understand user requirements and provide technical solutions

**StackLink Technologies**

April 2016 - Nov 2017

*Django Backend Developer*

- Write efficient code for backend applications
- Design and implement high-performance scheduler sub-systems for applications
- Create logics for Data processing and computations
- Implement Security measures and ways to protect data
- Write Basic Django server-side logic and code

---

## EDUCATION

---

**Federal University of Technology Akure (** 2016)

*B.Engr. (Hons) Electrical and Electronics Engineering*

- Development of a software backend system to help track and monitor school children
- Voice Recognition control synthesis software development
- Remodeling GPS module systems to save data consistently to a SQLite Database
- Power Generation and Distribution Data Logging System
- Electronic Module Creation and Programming via Arduino with VHDL/Verilog

**Federal Government College Lagos (** 2011)

*West African Senior Secondary School Certificate*

---

## PROFESSIONAL CERTIFICATIONS

---

- SQL Server certified Associate (ASCA)
- Applied Data Science Computing
- RS Project Management Professional (RSMP)

---

## PROFESSIONAL MEMBERSHIPS

---

Member | Nigerian society of Engineers (NSE)

---

## SKILLS

---

- Meticulous approach to work
- Strong backend development experience using Python
- Extensive knowledge of OOP, Design Patterns, and SOLID Principles
- Strong experience working with relational databases such as PostgreSQL
- Attention to detail
- Capable of meeting high standards
- Good problem-solving skills
- Analytical and technical skills
- Effective time management skills to meet deadlines
- The ability to work under pressure
