

Igne Butene

.NET, ERP expert, software engineer

IGNE.BUTENE@GMAIL.COM, +44 745 056 0300

I am a passionate professional who has strong software engineering, technical consulting, project and product management skills and a creative mindset. I believe innovation is what drives great business and creates added-value.

Experience

I have 8 years of experience in .NET and ERP development, technical consultancy, product and project management, being involved with more than 50 different projects.

The most recent product I have launched simplifies SSRS report development in Microsoft Dynamics NAV environment, removes the need for in-depth knowledge of RDLC reports and since it produces RDLC reports itself, reports can be easily deployed to customers' environments. The product has been developed on top of Simplanova Tool Stack built with .NET.

Product Manager @ Huedash (November 2016 – Present)

Huedash is a mobile social marketplace for fashion.

I am the lead engineer and product manager, responsible for the architecture and backend of the product. The backend is deployed on Microsoft Azure and has been implemented using ASP.NET Core Web API. The database (SQL Azure) is accessed via Entity Framework Core and is designed to scale. We make use of BLOB storage, notification hubs and SignalR.

Additionally, I manage a front-end developer with occasional code I write myself for Ionic 4 + Angular 4 (HTML5, SCSS, typescript) app.

Product Manager @ Simplanova (January 2016 – Present)

Part-time product manager, responsible for the product road-map, coordinating and consulting the product development team in implementation of new functionality as well as solving issues. Supporting marketing and sales department by writing articles, leading webinars, attending business conferences.

Technical Consultant @ LINKFRESH Software (October 2012 – Present)

Worked on over 30 projects (development, upgrades, support, consulting, performance tweaking) in different business areas (manufacturing, logistics, warehousing, trade) and technologies (Windows Mobile, Silverlight, Microsoft SQL Server, ASP.NET, Xml, WS, ORM, ERP).

Project Manager @ Simplanova (July 2012 – December 2015)

Simplanova is an innovative NAV development centre, introducing tools to improve Dynamics NAV development processes, helping Microsoft Dynamics NAV partners gain a competitive edge in the market.

I was responsible for project management, pre-sales, technical and functional consulting, engineering, research and development of tools.

As a lead software engineer, I have designed and developed the main tool stack, which consists of C/AL prog. lang. parser, abstract NAV object framework, working on top of parser-produced XMLs, various tools used to aid developers in Dynamics NAV development and upgrade projects.

Technical Consultant @ Internet Securities Inc. (Nov. 2012 – June 2013)

Company provides business information about emerging markets.

I had been a part-time consultant for their NAV implementation across different countries around the world.

Developer @ 1ClickFactory (November 2009 – September 2012)

The company is a development service centre, providing upgrade, development and training services for Microsoft Dynamics partners.

I had been involved in 7 development projects, 17 upgrade projects (RTC, WS, NAV 2009), 1 workshop, provided a few on-site and several on-line trainings for customers.

I had worked on design and development, upgrades, support. I had also done requirement analysis, documentation, design and .NET (C#) development for strategic-importance tools of the company.

Developer @ CreditInfo (August 2008 – March 2009)

Company provides debtor information via SAIS system.

I did ASP.NET front and back end development, Xslt stylesheets, web services, localization, integration, maintaining and developing MS SQL databases, support.

Developer @ Presme (June 2007 – October 2007)

Company provides development services for various ERP systems. I did development of HanzaWorld ERP, customer support. I have implemented company's website via Joomla and trained users.

Business Areas

- Finances
- Sales
- Purchases
- Warehouse
- Jobs
- Manufacturing
- Logistics

Skills

- General:
 - Presales
 - Product Management
 - Project Management
 - Team Management
 - Requirement Management
 - Customer Consulting
- Technical:
 - SSRS (RDLC) Reporting
 - Microsoft SQL Server:
 - Queries
 - Performance tweaking
 - Configuration
 - C#, .NET, ASP.NET, Web API
 - Entity Framework
 - Legacy (Silverlight, Windows Mobile)
 - XAML
 - WS (ODATA/RESTful, SOAP)
 - XML, Xpath, Xslt
 - HTML5, CSS3, javascript, typescript
 - RegExp
 - Git, TFS
 - UML, Agile, Scrum
 - Microsoft Azure, SQL Azure
 - ERP: MS Dynamics NAV

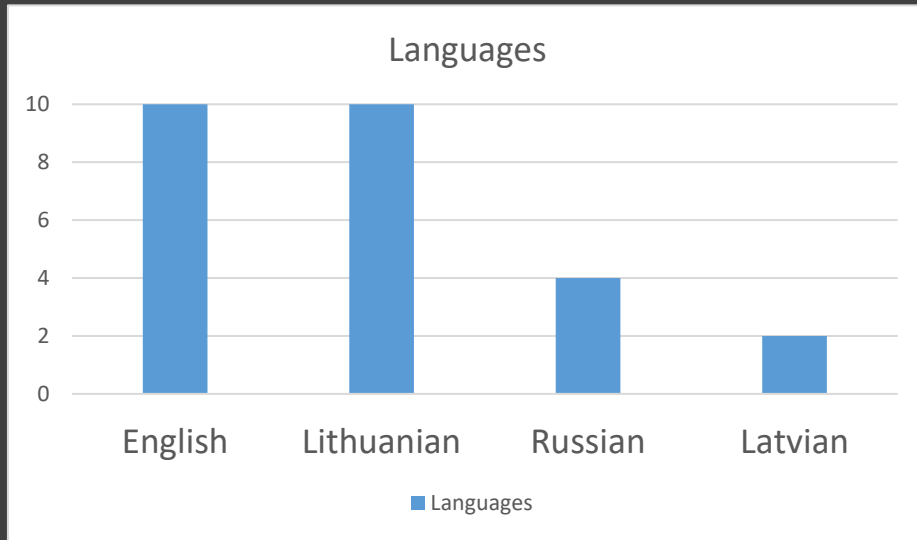

Education and Certification

I hold master's degree in Software Engineering (Vilnius University, 2006 – 2012).

I am a Microsoft Certified Professional (MCP) within these areas:

- Microsoft SQL Server 2008: Implementation and Maintenance
- Microsoft Dynamics NAV Core Setup and Finance
- Microsoft Dynamics NAV Installation and Configuration
- Microsoft Dynamics NAV C/Side Introduction

Languages

About Me

I like to take up challenges, find creative solutions and create new opportunities. My free-time passion is composing and playing music on various instruments as well as singing. I love exploring new things and new experiences, therefore I travel a lot.
