Instructing and Coaching – Providing guidance to the less experienced in the team and transferring knowledge by the means of mentoring or production of guides, providing advice to customers and stakeholders for the use of deployed IT systems and software.

Qualifications

- Cisco Certified Network Associate (TBC)
 - AWS Re: start program – AWS Cloud practitioner
 - Defence School of CIS (DSCIS) – Advanced Apprenticeship in IT & Telecommunications
 - Defence School of CIS (DSCIS) – NVQ Level 3 in Information Communications Systems
 - Defence School of CIS (DSCIS) – Technical Certificate in Telecommunications
 - Defence School of CIS (DSCIS) – BTEC Level 3 National Diploma in Telecommunications & information systems
 - Park High School - GCSEs in English, Mathematics and Science, Engineering
-

Professional Career Summary

Technical Service Engineer

2019 - Date

Tellemachus LTD

working as part of a team to assist with the deployment of offshore industrial ethernet networks

- Helping the team with the design phase of the network to ensure operability when implemented.
- Providing testing of the network to ensure serviceability is up to business standard
- Ensuring high level of support is given to promote business continuity.
- Installing, configuring and maintaining Siemens Equipment while minimising operational impact

British Armed Forces

Systems Operator and IT support

2015 - 2019

Working as part of a team of 30+ we constructed and initialized a fully operational LAN for high level government members to communicate over a WAN

- Constructed the infrastructure of the LAN prior to initialization including data cabling, power cabling, computers and communication assets needed for data transmission
- Helped maintain outbound data transmissions via UHF and voice means
- 1st point of contact for any faults found by the computer users, it was then my responsibility to try my best to rectify the fault, if no solution was found I would begin correct fault reporting and escalation procedures
- Wide awareness of WAN & LAN technologies with strong awareness of the security requirements needed.
- Providing VOIP & data for circa 300 staff users

Communication Systems Operator/Maintainer

2012 - 2015

Working as part of a two man team to provide data and voice communication across a wide area network of inter-operable communication systems

- Ensuring the equipment that is used in the communication platform is in a serviceable and operable state.
- Extensive fault finding in conjunction with providing communication for a wide area network to ensure high amount of up time within the network.
- Constantly monitoring the network to ensure we, as a team, provided strong communication services depending on the environmental conditions.
- Working with Various roles with secure communications systems, BOWMAN, FALCON & SATCOMS

Full-Time Performance Athlete

Paralympic GB

2016 - 2018

- Professional athlete helping & aiding a visually impaired athlete to achieve the winter Olympics 2018. Providing excellent communication throughout the process. Goal orientated, had to think quickly and clearly under pressure at a high international level
- Demonstrated excellent leadership as a pivotal athlete
- Prioritised studying for Cyber Security and meeting important deadlines whilst training & competing.

Career Highlights

- Providing tactical communications across the battlefield using voice & data services for a spearhead force in national & international deployments, supporting government agencies in a high pressured environment.
-

Continuous Professional Development

I am currently studying towards Cyber Security/Networking industry level qualifications as well as a member of Hack The Box penetration testing labs in order to safely enhance my Cyber Security skillset.
