

GORDON GREEN

14 Springtyne, Aberdeen. AB32 6NH • Tel: 07778 281 371 • E-mail: gordon.green57@gmail.com

PERSONAL PROFILE

A highly accomplished, technical and commercially astute professional with a background with 43 years within the oil and gas industry. First-rate experience in all aspects of design, manufacturing and engineering with a focus on subsea and surface well operations including drilling, well test and work over intervention / P&A. Well-versed in supporting processes within project lifecycles including contract award, design phases, manufacturing / procurement, installation and final documentation stages including QA / QC through to completion.

CAREER & ACHIEVEMENTS TO DATE

Surveyor – Self Employed

2016 – 2017

KEY RESPONSIBILITIES & ACHIEVEMENTS

- Undertook asset due diligence survey evaluations for national and international corporates including within Accountancy Practices, Financial Entities and Surplus Asset Purchasing Entities.
- Provided quality verification reports on mobile assets subject to business liquidation / administration / forced and sale legal ownership disputes.
- Performed assessments for international surplus asset purchasing business Liquidity Services (Network International) on oil and gas operator project surplus materials and equipment.

Director – CIE Well Control Ltd

2006 – 2016

KEY RESPONSIBILITIES & ACHIEVEMENTS

- Established CIE Well Control to provide innovative subsea well interventions and completion solutions from design to appraisal, manufacture, inspection, assembly, testing and certification stages for a breadth of clients.
- Led on the design, manufacture, repair, build and testing of well control pressurised equipment.
- Managed allocated projects and coordinated the design and engineering team to meet client schedules, deliverables and budgetary expectations.
- Supported Vetco Gray (GE), Schlumberger, Cameron, Drilquip and FMC.
- Completion (Landing String, Casing, Tubing Hanger, Crossover, THRT.)
- Drilling (BOP, WH Connectors, Choke / Kill Manifold, Valves, Risers.)
- Production (Surface and Subsea X Tree URP LMRP.)
- Intervention (Wireline, Slickline Electric Line, Coil Tubing) Workover and Well Test, HPU and Hydraulic Control Systems.

Senior Surveyor (CMC & Marine) – Det Norske Veritas AS

1992 – 2006

KEY RESPONSIBILITIES & ACHIEVEMENTS

- Held position as a Mechanical Engineering Surveyor and supported marine shipping and mobile installation class requirements relating to sub sea and drilling applications.
- Undertook certification (manufacture) / re-certification (re-work and modification) which covered primary capital equipment and systems to National Standards, DNV Classification Rules, Operator Specification and Industry Legislation Requirements, i.e. formerly SI 289 (1974) (prescriptive) and SI 913 (duty holder controlled performance standards).
- Represented the society at project meetings with well owner / contractors and advised of responsibilities.
- Professionally communicated with stakeholders across all levels of the business from shopfloor to Board.

Specialist Industry Applications

- Subsea well control equipment (workover and production).
- Well intervention and test systems design, build, test and certification.
- Subsea intervention lubricator (SIL) system.
- Well intervention (Sentree 3 and 7) systems.
- Drilling well control equipment / drilling hoisting equipment / drilling well test and wireline equipment.

General Industry Applications

- Structural (DNV 2.7-1) fabrications.
- Hazardous area (EX and EXP) portable / fixed equipment.
- Process pipework fabrication.
- Third party verification survey.
- Client independent loss adjustment survey.

DNV Courses

- VQ (Veritas Qualification) 001 drilling equipment and systems.
- VQ002 Subsea Engineering.
- VQ003 Hazardous Equipment (Electrical / Mechanical).

EARLIER CAREER SUMMARY

QA Inspection / Engineer	– Sun Oil Britain Ltd	1984 – 1992
QA Inspection / Certification Coordinator	– Marathon Oil	1984 – 1987
Certification Coordinator	– British Petroleum	1982 – 1984
QA and Repairs Coordinator	– London and Scottish Marine Oil	1981 – 1982
QA / QC Engineer	– Dan Smedvig	1980 – 1981
QA Inspector / Certification Coordinator	– AOC International	1980
Reconciliation Engineer	– British Petroleum	1979 – 1980
Materials Engineer / Coordinator	– Shell Exploration	1976 – 1979
Various Supply Chain Positions	– United States Steel Inc.	1974 – 1976
