**Personal Profile** An IT enthusiast with 2 years of Devops experience, seeking an opportunity to continuously learn and challenge myself. I frequently work with a variety of technologies including Linux, Python, AWS, Terraform, Jenkins, and the ELK stack.

## Employment History

### (11/17 - Present) **HMRC Digital - Junior Devops Engineer**

- Maintain and support logging, metrics, monitoring and alerting across service teams
- Create visualisations and dashboards using Kibana and Grafana
- Create AWS accounts using knowledge of IAM and VPCs
- Automate workflow with Jenkins pipeline , AWS codebuild and Lambdas
- Deploy immutable AWS infrastructure using Terraform
- Maintain Databases like MongoDB and RDS
- Implement security measures such as Bastion, security groups and firewalls
- Containerise tasks for consistency and simplicity across the platform using Docker
- Help new starters by participating in the modification of the on-boarding process.
- Compete in Hackadays to pave way for innovative ideas on the platform
- Implement Agile in all projects
- Cooperate with Product Owners and Delivery Leads to polish and prioritise the backlog
- Train Apprentices by pairing with them and help mould a curriculum
- Involved in User research to help identify pain points for our customers
- Give regular Demos and Tech Talks on completed tasks and new technologies

### (09/15 - Present) **Tutoring**

Tutoring GCSE's and A-levels, involves me simplifying complex processes, and adapting my explanations to suit the student so that they may understand. This reinforces my ability to communicate effectively, which is a transferable skill I demonstrate in the workplace, especially when presenting to team members.

### (06/15-09/15) **Exquisite Mandaps**

Customer service at Wedding Events; Decorative layout; Handling details of individual clients; following Health and Safety requirements; arranging quotes for functions using product catalogue
