

JUAN QUILES TOLEDO

Graphic Designer

Personal profile

I consider myself as ambitious person who loves design, specially UI/UX.

I am eager to learn more about 3D renders, so I work with software specialized in 3D modeling and photorealism called Blender.

Also I have collaborated effectively as team member and I know how to work under pressure. All my projects are based in a clean design and visual simplicity.

Work Experience

-  2018 • **UX Designer: Webantic Ltd**
Manchester (UK)
Designing multiples UX proyects, from sketches until final propotypes.

Communication Skills and Problem Solving

I have the ability to communicate efficiently and can express myself clearly and concisely.

If there is any problem, I always analyze the different factors involved in that and identifying the most important issues.

Also, I can come up with creative solutions due my experience with my clients in all this years.
