EXPERIENCE

PA Consulting, Cambridge, <https://www.paconsulting.com/>

Senior Software Developer

September 2008 - PRESENT

Architect, plan and lead the development of scalable database-driven web applications and web services including: employee evaluation systems, project management tools, document indexing and search solutions, finance solutions. Utilising .NET Framework, .NET Core, C#. ASP.NET MVC, SQL Server and front-end technologies (JavaScript, HTML, CSS). Comfortable with common design patterns, unit testing frameworks and continuous integration processes.

Lead developer on projects involving Microsoft Dynamics CRM. Worked with heavily customised (100+ custom entities, dozens of plug-ins) Dynamics CRM 4.0, 2011, 2013, 2015 and 2016 installations. Creator of bespoke functionalities within Dynamics CRM: risk management, quality assurance, assets management, automated multi-role approval workflows, conflict of interest management, multi-phase sale opportunities.

Hands-on experience developing data migrations, application integrations and services-oriented architectures with BizTalk Server and SQL Server Integration Services.

Participate in requirement gathering meetings and user acceptance testing in order to transform client needs into application designs.

Provide hands-on coaching and technical assistance to other members of the development team.

Continual improvement of development and operational processes and procedures.

Close collaboration with other developers, testers and the operations Team.

Enforce coding standards and executing code reviews.

Research and evaluate technologies with the aim to create value for the firm (comfortable with Azure App Service, Azure SQL Database, Azure Functions, Visual Studio Team Services)

Ctm-it Support, Cambridge, <https://www.ctm-it.com/>
