## PROFESSIONAL PROFILE

Focused and hard working I have shown consistent drive to improve throughout my career, I also have proven experience of I.T. support and networking within the workplace. Currently I am studying Junos CLI, GCHQ and Palo Alto security also CISCO systems CCNP networking qualifications online at the CISCO academy.

My first job was as sales assistant and after owner of a small retail sales business and as you can see in my career summary below I then went on to work for The Mobile Phone Repair Company as a mobile phone & cable TV, PCB, software instillation and repair technician. In 2005 to work towards personal projects I trained for a HND in construction, where for two years whilst studying I also worked two jobs and up to sixteen hour shifts working for Royal Mail and Iron Mountain PLC. I then worked full time within the construction industry after training, as a self employed construction worker. An opportunity arose to work within the I.T. technology & software sector to work as a Technical Support Assistant at Maryhill High School after that, where I worked in the networking and technical support of an RM CC4 School network.

Over the past two years I have been running my own business working designing and developing software and data rich web-content whilst studying part time towards Software Engineering and Networking qualifications. I am studying diplomas in HTML5, CSS, Javascript, SQL, PHP, XML and using Xcode, Visual studio code, Maya, Unity, Metal etc.for design within the workplace. My time is also spent following emerging technologies both logical and physical including Cloud - Saas, Paas, IaaS, Web 3.0, 5g,10g - 400 GbE and the IOT.

---

## WORKPLACE OBJECTIVE

I have always found it easy to maintain efficacy and positivity within the workplace and ultimately my main objective is to Improve productivity for your company whilst maintaining optimal performance and hopefully to progress through the ranks into a more senior role.
