Full UK dependant work visa until June 04, 2020 (I don't need sponsorship)

Profile

Possesses 8+ years of experience working as a software developer in large and small organisations across a range of industry sectors, including public sector, consulting and IT. Builds high standard quality of almost 70+ websites, software products that include e-commerce, e-learning, voting, reporting and tracking which I'd done most of it on my own from scratch including planning, Geographic Information System(GIS), REST, SOAP, database implementation, documentation and deployment. Most of the development I used are Java, PHP, ASP Classic, Adobe Experience Manager (AEM) and other frameworks.

Salesforce Software Developer

Specialist in Salesforce, Apex, SOQL, VisualForce, Lightning Components, Lightning Web Components, Consulting, Data, Integrations, UX, AWS, Testing and Deployment

---

WORKING EXPERIENCE

Software Developer   *February 1, 2017 – Current*

Arcus Global LTD.
Cambridge, United Kingdom
As a *software developer* I am responsible for the following duties:

- Developing Salesforce using Apex, SOQL, VisualForce, Lightning Component, Lightning Web Component and Community Cloud
- Build full-stack products for public sectors here in UK using Salesforce platform with integrations to other platforms, such as Amazon Web Services (AWS) Simple Secure Storage (S3) and lambda, Uk Geographic Information Systems (GIS)
- Created a product (prototype) which will be available in the AppExhange soon which I've done on my own using Lightning Web Component
- Use principles of good UX and common sense to create intuitive solutions for our clients, maintaining a consistent look-and-feel across our products.
- Interpret acceptance criteria into technical solutions following user-centric processes.
- Ensure that my code is of a high quality and meets Arcus coding standard.
- Work as part of a scrum team to design new features and estimate the effort required to build them
- Work with Test Engineers to ensure our products consistently meet high standards
- Use standard development tools (git) as well as platform specific and proprietary tools to optimise and automate your workflow
- Contribute to retrospectives and ensure Arcus continually improves its products and processes
- Watch the industry for new products and techniques we can adopt to improve performance and security, speed development or visualize data.
- Run show-and-tell sessions internally and externally to gather feedback on new features.
- Interpret technical and legislative documents to understand our clients' needs.

- Maintain Salesforce development qualifications
- Work with our customer fulfilment and support teams to resolve customer queries on short timescales

As a software developer in one of the core development function of Arcus, I was tasked with delivering high standard quality in coding, speed performance, deployment, security, proper documentation and implementation to all their products, and by building it;s all components from scratch in frontend and backend. My work delivered the efficiencies for the project manager and I received key positive feedback from the Account Manager. The development work I did bridged the gap in functionality and moved a key red project into the Green. My knowledge of the functional area and time management skills allowed me to keep on top of the technical specification and stay on top of the latest developments in technology.

Senior Web Developer   *August 28, 2012 – December 16, 2016*

Concentrix
As a senior web developer I was tasked to create, improve, review, deploy and maintain the product software of all internal and external clients of Concentrix. I was responsible for the following duties :

- Acted as the consultant of all the clients to help them improve their business performance in terms of operations, profitability, management, structure and strategy.
- Coding the whole system from scratch depending on what programming language they prefer
- Created websites for Internal client to track, do reporting and feedback in HR department
- Adding and Improving security about their payment gateways like Paypal, Visa, Mastercard and American Express
- Maintaining a consistent look-and-feel across our products.
- Detecting issues and investigating ways to resolve them
- Designing the database architecture.
- Adopting their existing system and try to improve it if needed
- Implementing agreed solutions
- Providing training and Documentation if a new module is created
- Responsible for Security and Quality Assurance in Dev and in Production.

Senior Web Developer   *March 01, 2011 – August 17, 2012*

Ripple Edge Development incorporated
As a senior web I was responsible for the following duties :

- Build full-stack products on PHP using Zend framework, Smarty, Less platform with integrations to PostGre and Australia Geographic Information Systems (GIS)
- Use standard development tools (git) as well as platform specific and proprietary tools to optimise and automate your workflow
- *Worked in accordance with Agile, attending daily Scrums*
- *Ensure that my code is of a high quality and meets RED coding standard.*
- Browser compatibility testing. Using W3C standard supported browsers
- Designing the database architecture.
- *Quality Assurance in Dev, QA and Staging.*

Izone Technology

As a ju*nior web developer* my primary task was to develop websites from front end to back end; I was responsible for the following duties:

- Converting the layout from PSD format to CSS using Adobe Photoshop and Fireworks for slicing the template and Adobe Dreamweaver for coding.
- Created online video streaming website that includes all API in Youtube, metacafe, Daily Motion, and google
- Build full-stack product Using PHP or ASP depending on client
- Browser compatibility testing. Using W3C standard supported browsers
- Designing the database architecture.
- Created landing page and lots of websites that include Payment gateways like Paypal, Visa and Mastercard
- Quality Assurance in Dev and in live url.
- *Quality Assurance in Paypal testing account.*

Junior Web Developer   July 10, 2009 – January 10, 2010

WebFocus Solutions Inc.

As a ju*nior web developer* my primary task is to develop websites from front end to back end; I am responsible for the following duties:

- Converting the layout from PSD format to CSS using Adobe Photoshop and Fireworks for slicing the template and Adobe Dreamweaver for coding.
- Browser compatibility testing. Using W3C standard supported browsers
- Designing the database architecture.
- Coding the whole system Using PHP or ASP depending on the client request.
- Phase 1 of quality assurance.
- Debugging of some bugs for phase 1 Q.A

EDUCATIONAL BACKGROUND

Tertiary/University
BS Information Technology   2005-2009
Far Eastern University – East Asia College
Manila

Secondary
St. Vincent Ferrer High School   2001-2005
Poblacion Norte Maddela, Quirino

Primary
St. Vincent Ferrer High School   1993-1998
Poblacion Norte Maddela, Quirino

Maddela Montessori School   1998-2000
Poblacion Norte Maddela, Quirino

PROFESSIONAL AFFILIATIONS

- Junior Philippine Computer Society
- Web IT
- Computer Society

SOFTWARE PROFICIENCY

Programming Languages
- C++
- Java Enterprise Edition
- Visual Basic .Net
- PHP – 8yrs Experience
- ASP classic - 2yrs Experience
- Adobe Experience Manager – 2yrs Experience
- Python – 6months Experience
- Salesforce Apex – 2 ½ yrs experience

Web Development Languages
- HTML / HTML 5 – 8yrs Experience
- CSS / CSS 3– 8yrs Experience
- Java script Vanilla / ES6 – 8yrs Experience
- XML – 7yrs Experience
- ASP Classic – 1.5yrs Experience
- Mootool – 2yrs Experience
- jQuery – 7yrs Experience
- Ext JS – 1yr Experience
- Jasmine – 1yr Experience
- Github CSS – 1yr Experience
- Angular – 1yr Experience
- REST API – 4yrs Experience
- NodeJS – 2yrs Experience
- Soap – 2yrs Experience
- Apex, Visualforce, Lightning Component, Lightning Web Component – 2yrs Experience
- AWS – 2yrs Experience
- Lambda – 1yr Experience
- Simple Secure Storage (S3) – 1yr Experience
- Geographic Information Systems (GIS) – 1.5yr Experience

Database Application
- PremiumSoft Navicat – 7yrs Experience
- MySQL – 8yrs Experience
- Microsoft Access – 7yrs Experience
- AWS – 6 months Experience
- SOQL – 2 ½ years of Experience

Operating Systems
- Win 98,2000,Xp, Vista, Window 7, Windows 10
- Windows Server 2003
- Ubuntu – 1yr Experience

Application Software
- Microsoft Office
- Open Office

Graphics Software
- Photoshop – 7yrs Experience
- Macromedia Fireworks – 2yrs Experience

- Movie Maker

Web Page Editors
- Macromedia Dreamweaver – 7yrs Experience
- Zend Studio – 7yrs Experience

Web CMS
- Wordpress – 5yrs Experience
- Joomla – 1yr Experience
- Magento – 1yr Experience
- Drupal – 1yr Experience

Web Framework / Templating
- Zend – 2yrs Experience
- Smarty – 2yrs Experience
- CodeIgniter – 1yr Experience

Methodologies
- Scrums – 4yrs Experience
- Agile – 4yrs Experience
- Jira - 4yrs Experience

PROJECTS ACCOMPLISHED

AGETECH WEBSITE
- HTTP://AGETECHACCELERATOR.COM/

AgeTech Accelerator programme has been in a unique position to provide cross-border support for businesses looking to test and scale their silver economy innovations in the UK, France, Belgium and the Netherlands. This website will support all the application to track, survey, and analyse their product and gives them the opportunity to sit down with potential buyers, commissioners, resellers and distributors to develop a strong value proposition and model.

Skills Used:
MySQL, JavaScript, CSS, XTHML, Jquery*, AJAX*
Backend:
Developed using PHP
Responsibilities:
- Build full-stack websites tools like dashboard, notifications, permission access, generating reporting, and feedback tracking that will enable each partners to assess all the applicants product
- Creating the look and feel of the tools, from front-end to backend
- Implementation and Deployment

CONCENTRIX SYSTEM – ACCESSIBLE ONLY IN INTERNAL
- HTTP://HRONLINE.CONCENTRIX.COM/

HR online website tool is for all the HR employee that notifiy them if any issues that has been filed from each employee, a tool if they need to promote one employee that exceeds expectation from their manager, a tool to track each employee key performance indicator (KPI) every year, a tool to notify the upper management to give feedback about the issue, appraisal and promotion.

Skills Used:
MySQL, JavaScript, CSS, XTHML, JQuery
Backend:

Developed using Wordpress
Responsibilities:
Full-stack core developer

- Almost all the websites below where all created in JAVA, PHP, Adobe Experience Manager(AEM), Salesforce with some especialize functionality in E-Commerce, E-Learning, Geographic information system, SOAP and REST API
