Aamir Aziz

Senior Director - Digital Operations

aamiraziz@live.co.uk

Summary

Aamir is a talented and accomplished modern business leader, someone that is equally as capable driving commercial growth as technological advancement. A strategist that performs admirably in agile environments, with a proven track record of increasing business performance and facilitating process improvement.

His expertise in Infrastructure Operations, Service Delivery, Strategic Planning, Process Automation and Change Management have carved an impressive career path.

Adept at building and leading effective teams across the globe and directing project management functions. Driven by a hunger to consistently exceed customer service, cost reduction, service improvement and productivity targets. All of which are testament to the level of responsibility he holds in a prestigious world renowned organisation such as GE.

Experience

Senior Director - Digital Operations at   GE Transportation
