EXPERIENCE

Macmillan Cancer Support, Vauxhall London—Senior *Web Developer (Contract)*

April 2018 - PRESENT

Working as a senior web developer to design and implement various fundraising websites. The team is 6 members and we work in 2 weeks sprint cycle. The Websites are hosted in Azure and for CI/CD azure devops is used. Git is source control used.

My work also includes api integration with 3rd party like sagepay, worldpay, dotmailer, instagiv.

I follow TDD and use various design principles and patterns when required.

Languages and Technologies used are C#, Asp.net MVC, Asp.net Core, Restful Web api using Asp.net Web api, JWT authentication, Entity Framework as ORM, MS Sql Server as Database.

The front end is using Angular, React, Styled Component, Redux, Node.js, Jqeury, Typescript, SASS, Gulp, Webpack, npm

I am also using Umbraco CMS.

McCann Erickson Central Limited, Birmingham— *Web Developer (Contract)*

November 2017 -March 2018

McCann is a digital agency, I worked as a contract Web Developer for them. Worked on design and implementation of web sites using Asp.net MVC, Asp.net Web api, Entity framework. In the front end I used HTML, Angular with typescript, LESS as Css Preprocessor.

I used Teamcity and Octopus deploy as DevOps tools and Git as Source control. The team was 4 members and worked in 2 weeks sprint cycle. Database used was MS Sql Server

Used Sitcore and Umbraco CMS

EasyJet Airlines, Luton — *Web Developer*

August 2014 - November 2017

Initially at easyjet I worked as a Web developer in Continuous Integration

SKILLS

Azure cloud, Azure DevOps, TeamCity, Octopus, Powershell

c#, VB.net, Asp.net MVC, Asp.net Core, Restful Api with Asp.net web api, JWT, EntityFramework

Payment Gateway integration, Email Campaign Service integration

Solid Principles, Design Pattern

MS Sql Server

Git, TFS,

Agile, Scrum , Kanban, TDD, BDD, Automated Testing

Sitecore, Umbraco

Certification

Sitecore Professional Development

and Production team mainly focusing in maintaining and enhancement of easyjet.com. The team worked in 2 weeks sprint cycle, following BDD and TDD approach. Technologies used were asp.net MVC, asp.net web api, WCF, NServiceBus in the backend and front end using HTML, knockout, javascript, jquery, css. MS Sql server was the database used. I was also involved with Devops task for CI and CD using teamcity, powershell script. The website hosted in AWS and Git was used as source control.

Working one and a half years in CIP team I was moved to digital transformation team where the main task was to rebuild easyjet.com using angular js and angular, typescript, sass as css preprocessor, gulp, npm, webpack in the front end and asp.net mvc, asp.net web api in the backend.

Money Debt and Credit Limited, Watford — *Dot net Developer*

July 2013 - July 2014

As a .net developer I was leading a team of 4 developers and was actively working in analysis, design and implementation of a web/mobile application called Zagzig which was a sales referral network site. The website was built using Asp.net MVC, the front-end technologies used were Jquery, HTML, CSS and backend restful services using asp.net web Api. Besides those I was also involved in designing and implementing the database for the system using MS SQL server.

Technologies Used: C#, HTML, CSS, JavaScript, Jquery, Restful services, Asp.net MVC, Aps.net Web API, Entity framework, TDD, MS SQL Server, TFS

Virtusales Publishing Solution, Brighton, East Sussex — *Analyst Programmer*

June 2011 - June 2013

I was working as a programmer and had to involve in Analyze, design, implementation and support of various modules of a workflow management system for the publishing companies. The system is an asp.net intranet web application. Implementation includes database designing if needed, programming using VB.Net and MSsql server, user interface development using HTML and CSS and client side programming using JavaScript and JQuery

Connectegrity Ltd, Besingstoke, Berkshire — *Junior Software Developer*

February 2011 - May 2011

I was working as a Junior Software Developer. Technologies used were: C#, TDD, Nunit, Ninject, Html, CSS, JQuery, teamcity, SVN, MS SQL Server
