Freelance Front End Developer

Profile

Enthusiastic front end developer with great passion for the latest technologies, creativity and always searching for innovative solutions.

Experience

Eurostar - September 2015 to Present

Part of the front end team responsible for building an integral customer focused section of the booking infrastructure with React Js, Redux, Webpack, Sass and with some exposure to BDD (managebooking.eurostar.com). Separately also responsible for building and delivering within tight deadlines responsive and dynamic emails with Foundation framework and integrated with Exact Target and Amp Script. In addition managing the Eurostar app built with Angular Js and Cordova and its deployment to the app store. Furthermore responsibility included training and supervising a graduate developer to enhance his technical and personal skills and insure a seamless transition from academic study into commercial environment.

BAE Systems - February 2015 to September 2015

Part of an Agile team building new responsive areas of the Three.co.uk website using GIT, Gulp, HTML5, Sass, OO JavaScript and Angular Js. Also attending regular face-to-face weekly meeting with the client at their offices. www.three.co.uk

University of East London - January 2015 to February 2015 (short term contract)

Part of the team rebuilding the new university website and making it responsive for mobile devices using Gulp, HTML5, Sass, OO JavaScript. www.uel.ac.uk

SYZYGY London - November 2014 to December 2014 (short term contract)

Developing large modular website for Mazda Japan in Grunt, HTML5, Less ad ES6 JavaScript.

Tribal DDB - August 2014 to November 2014

Part of a small team dedicated to the build of a new Volkswagen interactive configuration tool built in Java environment with Backbone JS, HTML5 and SASS. http://perfect.volkswagen.co.uk

Handmade Digital - November 2012 to July 2014

Worked on several projects for big corporates, including internal social platforms, web tablet applications, all built in .Net environment and responsive for mobile devices. Also designed and built the in-house website www.handmadedigital.co.uk. All projects were built using OO JavaScript, jQuery, Less. I've also had good exposure to Angular Js in 2 projects.

Sapient Nitro - September to October 2012

I've built the front end of a financial planning tool for Old Mutual Connect. The project involved use of OOP JavaScript and jQuery mainly, with the back end built in Django. I've

also worked on the front end of an intranet site built in Sharepoint for Public Health England.

DMG Media - May to July 2012

I've worked on different microsites and landing pages mainly for Metro and the DailyMail, as well as some internal project using HTML5/CSS3/jQuery. All the projects and to be built to be responsive for any mobile device such as iPhone, iPad etc.

Brand Advocate - February to April 2012

The main project was to build the front end of the new Hendrick's Gin website enriched with animation using CSS3 and jQuery. I've also built emails for Hendrick's Gin and done some development for Star Alliance. Example: www.hendricksgin.com

M&C Saatchi - January 2012 to February 2012

I've built and maintained website and email in HTML, CSS, JavaScript, jQuery for clients such as Mini.co.uk, O2, Topman. Example: http://magazine.topman.com

The Dubs - October 2010 to December 2011

I was in charge of building and maintaining the front end (HTML,CSS, Javascript) of top quality websites for clients such as iTV, BBC, Fremantle Media, Endemol, ING Direct, Australian Red Cross. In addition I helped the designer creating mockups or presentations for clients. Example: xfactor.itv.com/2011

Tangent Snowball - March 2010 to October 2010

The main duty was to build, using HTML/CSS and an extensive use of JavaScript / jQuery, top quality websites and emails from designs that the clients or the design team provided. I also helped the designers in the design process to avoid possible issues in the building process. Clients: Labour Party, Boots, Mothercare, Nails Inc, Which?, RSPCA, SAP.

Progressive Media Group - October 2008 to March 2010

My responsibilities, as front end developer, were to hand-code from Photoshop designs accessible and SEO friendly websites in W3C transitional or strict, semantic XHTML/CSS and developing user interfaces using the latest technologies such as JavaScript and jQuery. I have also acquired a good knowledge of Asp.net/C#. Example: www.newstatesman.com

Web Designer / Developer - Thames Valley Marketing - August 2007 to October 2008

My duties were to design from scratch new websites, from Photoshop mock ups to the final front end coding in XHTML/CSS and JavaScript. I also coded some of the back end using Asp.net/C#. In addition I was in charge of the maintenance and of the websites, dealing with clients via email, phone and face to face. Example: www.powerofpilates.co.uk

Telemarketing Executive B to B - Quantum TM - October 2006 to July 2007

(First job in UK outside IT) My duty was to call on behalf of leading technology companies as Microsoft, Symantec, IBM, Nokia etc. and speak to senior decision-makers about their IT and business requirements to generate opportunities leads.

I created websites and advertising material for different clients such as Caramanico Terme Council (Italy), restaurants, hotels, shops, musicians, artists etc. I was working in association with 'DEMA Industria Grafica' (Printing Company), which gave me the opportunity to understand some of the printing processes.
